## All new Yaris: Clever model features

### More clever ideas inside.

You're cramming more into your life, so all new Yaris is packed with more clever ideas. It has up to 25 storage compartments, while power windows, remote central locking and power mirrors are standard. The 60:40 split rear seat accommodates long objects and tall passengers. It slides forward and back for extra legroom or folds flat for extra luggage room, all with a simple tilt and slide action. More supportive seating, plus a reinforced body structure which reduces noise, provide more comfort with less fatigue.

### Performance with intelligence.

The 1.3 and 1.5 litre twin-cam multi-valve engines incorporate many clever performance ideas. Variable Valve Timing with intelligence (VVT-i) achieves the optimum balance of crisp acceleration with economy and surprisingly low emissions. The optional electronically controlled automatic transmission manages the power more cleverly, for fewer gear shifts uphill and downhill. Electric Power Steering (EPS) is cleverly engineered for a tight turning circle and easy parking, yet more road feel at high speeds.

### Big car safety features.

Anti-skid Brakes (ABS) with Brake Assist (BA) and Electronic Brake-force Distribution (EBD) come standard, and optimise braking in emergency situations. Also standard are two front SRS airbags, while the Enhanced Safety Pack (ESP) option provides an additional 5 airbags including a driver's knee airbag – an Australian first for Toyota. The rigid Safe-T-Cell and extensive crash testing have resulted in superior omni-directional crash protection capability. An all new suspension platform together with a long wheel base and a wide track enhance road-holding and stability.

### Looks small, feels big. Thats clever.

On the outside, all new Yaris reflects the latest European styling trends, having been designed at Toyota's ED<sup>2</sup> studio in Nice on the French Riviera. Clean, powerful bodylines also cut cleanly through the air and this means more economy and performance thanks to less wind resistance.
