TURN THE BACK SEAT
INTO A FRONT ROW...

THE SYSTEM THAT TURNS YOUR BACK SEAT INTO A FRONT ROW

If you've always longed for a peaceful trip where the kids were quiet for once, this accessory could be just for you. Along with playing movies, music and video games, you can even view various types of photo and video files with the Rear Seat Entertainment System.

PLAY ALONE OR PLAY TOGETHER

The Rear Seat Entertainment System offers three configurations. One, you can opt for a single screen known as a Master. Two, you can select a Master and Slave which simply means that the second unit plays whatever the first one is playing. And finally, you can choose two Masters so that your children can use them independently.

PURPOSE BUILT, PERFECT FIT

In order to optimise the entire experience, the Rear Seat Entertainment System has been designed to seamlessly blend without affecting your vehicle's speakers. Naturally, we've done the ultimate to ensure your safety with the Rear Seat Entertainment System having been designed to integrate with the vehicle's Active Head Restraint System. It also passes all relevant seat strength, seatbelt strength and head injury tests.

THE DIRECTOR'S CUT

Like a director's cut, this system has it all. Wireless headphones, 7" screen and remote control; in short, it has everything to keep your children occupied and content for even the longest trip. Take a closer look and you'll find that Toyota's Rear Seat Entertainment System really will turn your back seat into a front row.
