- Charging times are indicative only and may vary depending on environmental and charging conditions, type of charger and method used. Actual charging times may differ. Frequent use of DC fast charging can impact battery performance and durability. Toyota recommends minimising DC fast charging usage. DC fast charging speed will reduce after the battery is charged to 80%. Refer to Owner's manual and toyota.com.au/explore/electrified/charging-your-toyota for guidance.
- Dimensions are approximate and are subject to individual vehicle variances, accessory fitment and weight carried.
- Fitment of towbar requires deactivation of the kick boot sensor feature. Towing capacity subject to regulatory requirements, tow bar and vehicle design and towing equipment limitations. Ask your Dealer for Toyota Genuine tow bar capacity and availability details.
- Results were achieved under test conditions and do not reflect the driving range in real world driving. Results achieved for battery electric bZ4X Electric SUV is based on consumption rate of 138 Wh/km using the Worldwide Harmonised Light Vehicle Test Procedure (WLTP) accepted by the ADR 81/02 (displayed on the Energy Consumption label affixed to the car). The electric range and the energy consumption values were determined using a fully charged battery in a laboratory test and are not reflective of real world driving. Actual driving range may vary depending on accessories fitted, battery age and condition, climate, driving style, use of heating/cooling, traffic conditions, and vehicle load.
