Work never looked better

HiAce continues to build on its legendary reputation as the work partner that's ready to meet the challenge of any job, now and into the future.

Quieter, safer, more comfortable and with improved performance on the road, HiAce projects more than just professional good looks.

Every element, both inside and out, has been carefully designed to make it more functional

and incredibly versatile. Halogen Daytime Running Lamps ensure you'll be noticed, while the semi-bonnet design allows the engine to sit forward to provide greater driver comfort and better driving stability.

The van variants also feature dual sliding doors and a single sliding door option (LWB only), making it easy to load passengers, or standard AU size pallets (SLWB only) in and out.

You can also choose the option of two outward opening barn doors at the rear to allow greater accessibility and easy loading right up to the rear sill. More than just the ultimate task master, HiAce is ready to work harder, smarter and any way you choose. Work never looked better.

The perfect work environment

Foreground: HiAce LWB Crew Van shown
Background: HiAce LWB Van shown

Jump into HiAce and you'll discover the perfect mobile workspace that's filled with well-considered features and creature comforts.

The light-filled and ergonomically inspired layout places all the controls and handy storage spaces just where you need them to make your time travelling in the HiAce as convenient and practical as possible.

Locating the engine forward of the cabin ensures extra quietness, as does the increased sound absorbing material surrounding the engine, resulting in reduced gear noise.

With a comprehensive selection of steering wheel mounted controls, including telephone, audio, cruise control, voice control and Lane Departure Alert, you've got virtually all you need right at the tip of your fingers.

The windows and surrounds have been carefully designed to provide maximum vision and light to brighten the entire cabin space.

HiAce, it's a first-class space to work.

- B Large glove box – LWB Crew Van shown
- C USB² ports and drink holders, selected passenger positions – Commuter GL only

Making the
tough jobs easy

When there are jobs to be done, you need a partner that's built to give you everything it can, for as long as it's required. With the proven reliability and power of a 2.8L turbo diesel engine, HiAce delivers all the muscle you could need when it's time to swing into action.

The intelligent 6-speed manual transmission, available on HiAce LWB diesel, provides excellent start-off and uphill performance at cruising speeds as well as automatically balancing the engine speed to ensure the smoothest possible gear changes.

The stop and start system on HiAce automatically stops the engine when sitting idle at traffic lights or in congestion, and then restarts the engine automatically when the foot is removed from the brake. Manual transmission variants will restart when the driver presses the clutch.

Working with effort-reducing technology is no longer the exclusive domain of office dwellers. HiAce is equipped with all the smart thinking you need to make a long day a little lighter.

The 8" touchscreen display includes satellite navigation³ to keep you moving smoothly around town. The audio unit includes digital radio plus USB ports and Bluetooth®⁴ connectivity. You can also connect compatible smart phones to use wireless Apple CarPlay®^{5,6} and Android Auto™,^{5,7} (speak to your Dealer about device compatibility) to assist you while on the road.

The 4.2" colour Multi Information Display provides you with valuable trip information including fuel efficiency, distance travelled and outside temperature.

Travel safely to work and home

When working long days, you need an environment to support both your mental and physical wellbeing to help you get the job done safely.

Every HiAce comes with the assurance of advanced safety technology including a range of innovative features to protect you as you go about your everyday business.

These include Toyota Safety Sense[®] as standard across the range. The Pre-Collision Safety[®] system with pedestrian and daytime cyclist detection can help sense and take action in case of potential danger ahead. Lane Departure Alert[®] warns you should you inadvertently drift out of your lane, and Automatic High Beam[®] dips your headlights as another vehicle approaches. Road Sign Assist[®] (speed signs only) is designed to detect certain speed signs in front of you as you're travelling, and display them on the Multi Information Display.[®] If you happen to be driving over a recognised speed limit, an audible and visual warning will be displayed, reminding you to slow down.

Blind Spot Monitor[®] warns you if a vehicle is in your blind spot on the open road. This is standard in every HiAce, as is Rear Cross Traffic Alert,[®] that warns you of vehicles approaching from either side when reversing out of a parking spot.

B Reversing camera with moving guidelines – overseas LWB Crew Van shown

C Blind Spot Monitor – downward visibility mirror is only available on SLWB Van and Commuter

Toyota Safety Sense

Toyota
Safety
Sense

At Toyota, we believe it's simply not enough to say "safety comes first" – we prove it. That's why, in our on-going pursuit of creating ever safer cars, now and into the future, we developed Toyota Safety Sense[®] (TSS). A suite of active safety features designed to help support safe driving and help protect you and your passengers.

HiAce features the latest TSS driver assistance technologies, aiming to recognise and help avoid certain hazards and collisions, giving you and your passengers greater peace of mind wherever you're headed. Please visit toyota.com.au for vehicle and specification information.

Lane Departure Alert

Lane Departure Alert[®] is designed to help prevent vehicles drifting from their lane, by monitoring road markings, and providing a visible and audible alert should it detect any deviation from the lane.

Pre-Collision Safety system with pedestrian and daytime cyclist detection

Pre-Collision Safety[®] system with pedestrian detection and daytime cyclist detection, was developed to help reduce the likelihood of a frontal collision with cars, cyclists or pedestrians. Forward Collision Warning[®] uses radar to help alert you to imminent threats. During braking, Brake Assist[®] can help to slow the vehicle by applying additional force. If the driver has not applied the brakes and if the system detects a collision may be unavoidable, Autonomous Emergency Braking[®] can apply the brakes to help mitigate the impact.

Automatic High Beam

Using a camera to sense either approaching headlights or the taillights ahead, Automatic High Beam[®] aims to help maintain safe and considerate driving by switching between high and low beam as needed.

Road Sign Assist (speed signs only)

Road Sign Assist[®] was developed to help recognise road speed signs and provide information to you. It displays the most recently recognised speed limit on the Multi Information Display.

Toyota Connected Services⁹

• • • • •

1 year complimentary access⁹

Driving should be easy, enjoyable and safe. That's why inside every connected Toyota you'll find a suite of advanced features focused on safety, convenience and a better driving experience.

To learn more, please visit toyota.com.au/connected

myToyota Connect¹⁰

In a world driven by information, the myToyota Connect app allows you to seamlessly integrate your smartphone with Toyota Connected Services. You can receive diagnostic details including the odometer and fuel level, as well as access to your Owner's Manual. You can also see travel details,¹¹ such as time and distance on the road plus the last known location and parking spot.

Automatic Collision Notification¹³ (ACN)

Every second counts when assistance is needed the most. Should an airbag deploy or a severe collision be detected by the impact sensors, Toyota Automatic Collision Notification (ACN) is designed to automatically connect with our 24/7 Toyota Emergency Assistance call centre. If you're unable to communicate or respond, we'll immediately contact emergency services and direct them to your vehicle's location.

Stolen Vehicle Tracking¹² (SVT)

Should the unthinkable unfortunately occur, you'll have the peace of mind of knowing Toyota Stolen Vehicle Tracking (SVT) is designed to help find your missing vehicle. After filing a stolen vehicle report to the police, and providing your VIN and police report number to a Toyota Stolen Vehicle Assistance agent, the agent will validate your SVT subscription and initiate tracking. They can then provide updates to the police to assist with the potential recovery of your vehicle.

SOS Emergency Call¹⁴

If the situation ever arises where you require urgent assistance, it's comforting to know help can be available at the touch of a button. In the event of a genuine emergency, you can speak directly to a Toyota Emergency Assistance agent, 24/7, simply by pressing the dedicated SOS button in your vehicle. If required, they can direct emergency services to your vehicle's location.

Fit for purpose

Our hassle-free French Vanilla is the perfect match to pair with your branding, or to simply stand out on the road. Enjoy the comfort of Grey fabric interior in all HiAce models as well as soft touch Beige fabric seats with grey synthetic accents which is exclusive to the HiAce Commuter GL model.
