1 Weights/mass/volumes/dimensions are approximate and subject to individual vehicle variances, and should be confirmed before fitting any accessories, towing or otherwise relying on this value.

2 Power and torque test standards differ. Ensure comparisons use same test standard.

3 Results were achieved under laboratory conditions and do not reflect the emissions in real world driving. Results achieved for Yaris Cross SUV hybrid petrol in ADR81/02 combined drive cycle CO2 testing. Combined cycle results achieved 86g/km 2WD and 90g/ km AWD. Results produced in laboratory test conditions, using new sample vehicles without fitment of accessories/customisation, and may not be replicable.

4 Results were achieved under laboratory conditions and do not reflect the fuel consumption in real world driving. Results achieved for Yaris hatch hybrid petrol in ADR81/02 combined drive cycle fuel consumption testing. Consumption rate of 3.3L/100kms (2WD) and 3.6L/100kms (AWD) achieved in Urban cycle. Results produced in laboratory test conditions, using new sample vehicles without fitment of accessories/customisation, and may not be replicable.

5 Maximum vehicle braked towing capacity is subject to state and federal regulatory requirements. Before towing, customers should consider the vehicle's limitations, including towing capacity specifications, gross vehicle mass (GVM), gross combined mass (GCM), kerb weight specified by the manufacturer, and ensure that individual front and rear axle load limits are not exceeded as also specified by the manufacturer. Vehicle payload calculation is GVM less kerb weight or as otherwise specified in the vehicle owner's manual. Actual payload is affected by any added load to the vehicle, including the number of occupants, luggage, accessories, and tow ball download weight. It is important to consider the actual payload, to ensure the fully loaded vehicle remains within the specified GVM limits. For more details, please refer to the vehicle's Owner's Manual/ Toyota Basic Towing Guide or consult your authorised dealer. Toyota recommends use of a

Load Distribution Hitch (LDH) when towing loads greater than half of the vehicle's GVM or as specified in the Owner's Manual. Based on road conditions, a LDH may not be suitable. Refer to Toyota Basic Towing Guide. Toyota Genuine LDH sold separately at additional cost. Warranty conditions apply. Refer to **Toyota Warranty Advantage Guide**.
